WORK EXPERIENCE
 1 October 2024 - Currently

DevOps Engineer/Project Manager

DevOps Engineer/Project Manager – Fraud detection department

Worldline Switzerland, Zurich (Switzerland)

End-to-end management of technical projects such as Artifactory, Instant Score, and RHEL8/9 migrations. Administration of Linux servers, automation using Ansible (YAML), Bash, and Python. Deployment and management of AWX and CI/CD pipelines with GitLab. Job creation and monitoring in BMC Control-M. Oversight of small-scale migration projects to Google Cloud. Support and maintenance of the Riskshield application. Strong focus on operational efficiency, automation, and continuous delivery.

1 May 2021 – 30 September 2024

DevOps Engineer

Six Group, Zürich (Switzerland)

As a DevOps professional at Six Group, I demonstrate strong leadership skills while effectively managing projects such as migrating from RHEL7 to RHEL8, automating patch processes, and integrating Docker for application deployment. My expertise includes programming in C++ and Bash, working with Artifactory and BMC Remedy, and managing environments on RHEL7 and RHEL8. Additionally, I proficiently handle containerization tools like Docker and Podman, orchestration platforms like Openshift, migrate on-prem servers to Azure and monitoring solutions like Splunk, ensuring smooth and efficient DevOps operations.

23 July 2018 – 30 April 2021

Linux Engineer

Burberry, Barcelona (Spain)

I perform tasks from installing servers in Linux (Redhat, SUSE), configuring and creating FS, mounting volumes, expanding and reducing space... creating and modifying users, creating Ansible and Bash scripts, incidence troubleshooting, clusters, Systems and packages updates... Virtual servers migrations with VMWare....

I also take responsibility for backup tasks with Data Protector. Creation of specifications, creation of schedules, solution of software and hardware incidents.

28 November 2014 – 20 July 2018

Systems Administrator

Grifols S.A., Sant Cugat (Spain)

We manage the basic administration of Unix, Linux and Windows systems, manage alerts HP OpenView, run backups with Data Protector, Oracle Tablespaces review, review of filesystems, creating users in LDAP and OpenLDAP. Being oriented to Linux, I install applications, update patches, create scripts in bash and perl and solve incidents. In terms of virtualization, I work with VMWare. We install servers from the data they provide, we add disk, memory, CPU ... We perform some Vmotion, we put hosts in maintenance mode, we move servers to different datastores and / or hosts...

04 September 2014 – 28 November 2014

Linux Administrator

Metrica Consulting/ITNow, Barcelona (Spain)

We manage the administration of Linux machines, creating scripts in bash and perl, create monitoring rules in HP Openview and Nagios, release or expand space and create filesystems, creating tablespace.
